

4.1) We welcome any comments you wish to share about this conference (which plenary lecture was your favorite, suggestions you would make regarding future conferences, etc.)

1.3 I am a statistician, not a scientist. Exhibition of no professional interest to me except for publishers

1.4 I do not use social media for anything

The posters on the 2nd floor were out of the way of most delegates. A public announcement encouraging delegates to head that way would have been helpful.

online poster voting was flawed, nothing to stop spam voting.

program planning for fine debris analysis meant that sessions were missed. Should have spread them out a bit.

The locations of the presentations were too scattered makes it a struggle for participants to run between locations. registration counter staff didn't seem to know a lot, especially when asked about directions and location

good lunch spread  
good that posters were left for whole period.

classrooms for oral presentations were sometimes too stuffy and if the aircooler is on, it gets too noisy

organisers seemed to be very confident of the participants sense of direction, leaving participants after the study visit stunned without clear instructions

- 
- 1 change of rooms - not properly announced or coordinated, participants could not find the rooms
  - 2 reception counterstaff was not very helpful, e.g. could not pinpoint the location of the conference dinner on a map
  - 3 Themes - more systematic approach to organise by discipline, easier for participants
  - 4 oral presentations - too many parallel sessions
  - 5 transportation between venues should be provided before and after workshop study visit
  - 6 Speakers - instruction to speaker is limited, did not know where/who to approach to save oral presentation. Waited about 20 minutes for the lady with laptop to appear for his function
  - 7 Auditorium - too hot and stuffy
- 

The agenda was very packed and often some of the workshops overlapped with lectures of some themes. The workshops may work better if on a different day/time to lectures. I am not sure this worked very well

- 
- Physical Anthropology,
  - Forensic Entomology.
  - Questioned Document.
  - Cyber Criminology. (Multimedia Science).
  - Criminology science.
-

Eoghan Casey & KP Inman

not to put similar topics in parallel

parallel topics should bear far as possible from each other from a content point of view

I especially enjoyed the lectures by Sirs  
Palenik, very encouraging. I also enjoyed meeting  
some of my hero's in TRACE EVIDENCE.  
Through our scenario there was an overlap between  
lectures in fibres evidence. It was only at  
two blocks and hence I had to skip 3 of the 6  
lectures in fibre evidence. also some of the  
lectures felt in the wrong there if you ask me.

Excellent conference! The venue was perfect and it was extremely well organised. It is difficult to think of my best plenary lecture but my top 2 were the cognitive talk and the art of plenary lecture. Some points for the future: Posters - It was difficult to find some posters - and not always possible to download a copy. Could organisers take a photo of each + post on the website instead of relying on scientists to provide a pdf? (this may require an "opt out" of course) and : email addresses; a complete list of email contacts for all speakers on the web site would be hugely useful, alongside

- 
- Best lectures: James Curran and Ian Everett
  - Do not plan workshops at the same time as lectures.
  - Randomness in determining winners for the best poster and for the forensic poetry contest.
- 

It was not clear to the conference attendees when to turn up to the many poster sessions.  
(though it was very clear to me when I had to be at my poster).  
Thoroughly enjoyed my time here.

---

too many parallel sessions  
5 would have been maximum  
→ more exposure to speaker  
→ more interdisciplinary

---

I loved the actuality of the presentations, such as the Christchurch earthquake, Japan tsunami and Norway attacks. Especially the Norway presentations were very good and made a great impression on me!!!

- 1) moving between lectures extremely awkward because of lack of time and complexity venue. I was left out one occasion because I was later (previous lecture went overtime) and on 2 occasions because the room was full
- 2) problems with registration prevented me from going to the excursions I planned and registered for.

suggestion: do not try to secure as precisely most time - every delay will roll and cause problems

- Surnames could be spelled in full
- There should be only one price including Conference Dinner for all - too many young participants didn't attend the dinner because they would have to pay it themselves
- Dress Codes should be given in advance
- The number of posters per institution could be limited to, say 10...
- outstanding organisation: I really don't know a single thing to criticize  
Splendid even in the tiny details
- It really lovely conference which left behind a great first impression about NFR

Fabulous!

program very well organized - too many good lectures to choose from / overlapping made it difficult to select which one to go to.

The 5 minutes of transfer time planned to change session was a terrific idea. The American Academy of Forensic Science could get lessons from you!

---

I was delighted by the organisation of the conference. NFI did a tremendous job

A single negative point: workshops at the same time as presentations was not convenient

Many thanks for all

---

Improve administration (registration, visits, ...)

- 
- conference should be smaller / fewer lectures
  - more interactive
- 

- I prefer workshops with interaction instead of workshops with only presentations
- very well organized conference!
- wednesday afternoon visits of ICC, ICTY etc.: great!

Thank a lot for the beautiful days in The Hague!

---

TOO ~~MANY~~ PARALLEL SESSIONS / PRESENTATIONS

---

conference was too broad and un focussed. Large number of parallel sessions made for a very complicated programme with less time for discussions with delegates. Venue was interesting but some exhibition space was too remote

---

My favorite plenary lecture was the Mathematics and Artificial Intelligence in Digital Forensics. It was very useful for us. In my opinion there were too many big mathematics lectures at the same time; and we were only two people from our institute; I feel we missed a lot of information.

---

I am officially not very satisfied. I think you wanted to impress people by being bigger than the host, which resulted in a weird schedule, with thousands of parallel sessions. In the end, I only went, or will go to a total of 15-16 scientific presentations and workshop, while I can assist to 20-25(!) in a normal scientific meeting. So, for the next time, please cut down parallel sessions and long empty speeches, focus on science, make shorter time slots and reduce the number of parallel sessions so we have a chance to actually assist to more than a few presentations.

Reduce the number of parallel sessions as there were talks I could not attend due to clashes  
Increase places for field trips

---

To many interesting presentations at the same time forced me to make some difficult choices and made me miss some interesting presentations.

If attending a workshop, you'll miss many interesting presentations.

---

The workshops were not scheduled at an appropriate time → at the same time as lectures of the same theme

Please, open the coffee bar as soon as 08:00 a.m. ☺

Don't schedule the workshop during the lecture of the same theme

I am very disappointed by the whole organisation of everything related to the posters. As someone who was presenting a poster I felt that they were left behind ~~and~~ and not much importance was put on them, with the sessions being at lunch people were more interested in eating. I also feel that the voting system was appaling; ~~as~~ personally I put a lot of effort into my poster and to find out that it was in a popularity contest and that each poster was not going to be judged on its individual merit shocked me. We put in the effort why isn't it you? The fact that anybody could vote from anywhere in the world meant you could ask people who hadn't even seen your poster to vote. This was made even clearer when the number of votes for the winner was announced (~~approx 1000~~; there were not that many people at the conference, therefore this system was definitely corrupt and unjust as ~~the~~ that form science tries to avoid!

Some overlap in topics from speakers. Sometimes lectures on the same field of interest on the same time, which was a shame

place workshop, lectures, outings/visits on separate days, as block of events so those who wish to attend each block of events can do so. If not, he/she can leave early

Staff didn't seem to know what was happening with conference, told one thing and then the exact opposite happens. e.g. told there would be no luggage storage when in fact there was but had already paid for storage

Auditorium wasn't large enough for numbers of people.  
Very disappointing with closing ceremony

Should have a very well organized evening conference. Should be freely but the balance between the main and the little program was weighted in favor of the main for the conference.  
I am not in favor of the workshops being run during the conference. There is too much of a domination of being cut off participant.  
I personally enjoyed some meetings so the value of my conference is very limited because of other people's commitment.  
Overall good but suggest fewer parallel sessions.

I FELT THE ALLOCATION OF STUDY VISITS COULD OF BEEN BETTER ORGANISED  
- DIDNT RECEIVE A VOUCHER FOR ANY STUDY VISIT EVEN THOUGH I ASKED TO  
ATTEND NFI. ON THE DAY 40/80 PEOPLE ONLY ATTENDED (NO FAULT OF ORGANISERS  
- BUT DELEGATES) AND I WAS THEN ALLOWED ATTEND (WHICH WAS GREAT- I WOULD  
OF BEEN BITTERLY DISAPPOINTED). IN HINDSIGHT I WOULD OF REQUESTED  
INTERESTED PARTICIPANTS COULD COLLECT VOUCHERS ON MORNING OF VISITS,  
WHILE PREVIOUSLY SUBMITTING PASSPORT DETAILS.

- The time to go to another lecture was too short.
- The time to write in a long row at the desk was not ~~necessary~~ necessary
- I couldn't ask anyone to show me where my class was;  
it would be nice if there were people, if you were lost,  
to show you were to go
- The noise of the airco! You could hardly listen to  
the orator.

THE LUNCH, BBQ, DINNER ~~were~~ were good!

Loved the cartoonist!

Great.

Poster download stations didn't work?  
Not every poster was available at the download station

Messy organisation. Too many parallel sessions making it difficult to attend. Abandoned after study visits with no support on return to hotel.

Pleasant sessions too short due to many announcements and time to change venue - speakers unable to go into greater detail.

Too much multi-disciplinary focus resulting in lack of depth.

Rooms with no microphones for audience to ask questions.

Chaotic registration. Lack of QC - damaged lanyard and broken conference bag.

especially for these  
people b/c bank transfers

~~1.~~ To send the poster as a pdf-file and have it printed would be an option. It's the organisers making it more convenient to travel. :-)

2. The beach party was fantastic! Food & dancing!

3. There should be dancing and some time to chat after the conference dinner. This is the evening that you have gathered a "list" of people that you really would like to talk to!

- 
- ① Transport should be provided ~~after~~<sup>before</sup> study visit. No instructions were given as to how to come back.
  - ② Staff at special desk were helpful but has no knowledge of where the rooms are as well as how to move from place to place. Example, does not know where the conference dinner is held.
  - ③ Some workshop are very interesting and refreshing e.g. Forensics 2.0 - responding to a changing environment.
- 

Too many interesting lectures and too many int. workshops were on same time.

---

Very good scientific programme!

---

- Too many topics at the same time
- Workshops in between prevented me to go to interesting presentations
- Posters on so many levels and in too many places → impossible to follow it all up; impossible to vote since not all posters could be evaluated

car payment/registration did not work  
No visits could therefore be attended,  
but we registered very early and  
e-mailed to let <sup>paid</sup> booking for confirmation

A rough time schedule would have  
been good enough for booking ticket  
and hotels (start/ending early/late during  
the day...)

I would have liked a bit more  
presentations about crime scene work/  
firearms examiners work.

- 
- 1) Speakers kept to time which enabled questions - great!
  - 2) Tour of NFI was excellent - but I was lucky to be visiting labs of interest (would have been slightly sad if had missed out; ask for these options next time?)
  - 3) Great social events! and everybody friendly!
- 

- 1) WORKSHOPS SHOULD NOT OVERLAP TO ORAL PRESENTATIONS, BUT HAVE A SPECIFIC OWN AFTERNOON (OR MORNING)
- 2) IN SOME CASES, THE ORAL PRESENTATIONS WERE NOT OUTSTANDING AS FOR THE RESULTS, AND I THINK THAT IN THOSE CASES A POSTER WOULD BE MORE THAN ENOUGH
- 3) I FOUND THE PLENIARY LECTURE OF DR DR REALLY INTERESTING AND FULL OF FASCINATING SUGGESTIONS
- 4) I APPRECIATED THE WORKSHOP LED BY BKA TEAM ON BIMBYPATRIE

- 
- THE CONFERENCE WAS VERY WELL ORGANISED AND IT SUCCEEDED VERY WELL
  - THE GOVERNMENT OF THE NETHERLANDS IS DOING OUTSTANDING AND REMARKABLE WORK IN SUPPORTING FORENSIC RESEARCH
  - THE CSI THE HAGUE PROJECT IS GREAT AND WE IN FINLAND WANT TO COOPERATE WITH IT / NFI / NETHERLAND POLICE
  - PITTY THAT WE NEED TO WAIT 3 YEARS FOR THE NEXT CONFERENCE
  - EXCURSIONS WERE GREAT - I AM JUST SORRY THAT I DID NOT GET A CHANCE TO VISIT EUROPOL II
  - WE ARE PLANNING TO VISIT THE HAGUE AGAIN BEFORE THE WINTER TO START FRESH NEW COOPERATION BETWEEN WITH THE NETHERLANDS AND FINLAND

It would be good to see some more  
papers / sessions on Forensic Medicine  
The presentations on education & training  
were very useful.  
Toxicology would be another topic you  
could have more of.

I found the conference very well organised and would like to thank  
the secretariate for this. However, I found the thematic was a bit  
enforcing and not well defined - as a result it was more  
useful to go through the program in detail to find parts of  
interest. Finally, I found the program too dense and too full -  
it didn't leave time for discussion after lectures or networking  
in between.

Too many parallel sessions competing  
with each other, so choices were  
~~too~~ often between lectures / workshops  
with similar themes / topics.  
Also ridiculous conflicts with the  
plenary lectures.  
No real sense of a group of  
people gathered together.

Fauconet: lecture of DRUR (too short!)

too much things to do! makes you have to make choices.

maybe on the excursion day some presentations /workshops could be repeated.

Good conference! Looking forward to the next!

Very good organisation TY

Plenary session Kaiser was very nice.

just one comment about place: it is quite a labyrinth!

Sometimes it was difficult to find the right way.

- Reduce queues at registration.
- Reduce queues at buffet areas.
- Give directions to designated lunch areas.
- Put less salt in the food.
- Provide directions back to conference, after study visit
- Provide transport back to conference.
- Turn on airco during hot weather.
- Parallel sessions are too short to go in-depth.
- Visits to institutes should have guided tours, not just lectures in the buildings.
- coffee/tea should be available throughout
- give handouts during the sessions.

My favourite lecture/workshop was: R. Selvaraj, Do more forensic work in less time? .. It was brilliant! ☺

My worst experience was the hot hot bus to the City Hall.  
I almost died - seriously! ☺

I missed the lunch the first day since it was not announced in the program - that was a pity!

The beachparty was really great. I enjoyed it a lot as well as the

I would also like to attend any Coming Conferences of forensic Science.

This conference reminded me why I am in forensic science. It has inspired me to stay in this field and look for opportunities.

The speakers were all relevant and the information was fresh.

My favourite aspect was the multidisciplinary approach.

The visit to Europol was also a highlight.

My favourite lectures were from Manfred Kaiser and Drs. Ido.

Thank you for a wonderful experience

A map with the locations of posters with specific themes would have been helpful. Also a formal poster presentation time would be better as many people extended their lunch rather than go to the poster session.

Workshops very good.

Missed some information about lunch and that companies and posters had to end their sessions before the end of the conference.

Favourite plenary lecture: Eoghan Casey.  
Least favourite: Bob Reed (mostly very basic concepts)

Visit to Europol was a bit disappointing. The two speeches were alright, but could as well have been held at the conference venue. No demo; we just got to see an (admittedly impressive) conference hall.

I'd like some more presentations on digital forensics both technical as well as legal/ethical (privacy aspect).

more attention for the poster (sessions)  
no break up of sponsor stands during the conference  
no pre registration for the visits (lot of people did  
not show up and others really wanted to go, but  
did not have a ticket)

- Try to schedule workshops at different times than related presentations
- Could have informed us earlier that desired visits could not be organized (of course everybody wanted to go to the NFI) • Get ICIY, did not attend and could not "give my seat" to someone else.
- Poster numbering? WT..?
- Otherwise, great organization (before and during the conference)  
Good job!

The study visits could have been organised better. I understand about difficulties w/ passport numbers ~~and that~~ not everybody could go but ~~and~~ I don't think there was a suitable alternative programme (apart from a few very specialistic workshops) for the ones that stayed behind. Also, practical information could have been provided in a better way.  
The end time of the visit (Europal, which I went to) was not clear. This caused ~~very~~ difficulties in logistics (also w/ the planning of our booth as ~~as~~ sponsor) which could have easily been avoided had I known that the visit lasted till 14.30 instead of 17/17.30 stated on the ~~posters~~ posters in the hall. Please insure clear communication! Also very important: those who didnt go to the plenary speakers were not received in a pleasant way I think ...

Go And See How Well Will Powerline (or AHE) Perform!!

Where Is the Secondary?

Excellent - Thanks for all the hard-work.

NETWORKING OPPORTUNITIES WERE LIMITED A LITTLE BY  
CONSTANTLY MOVING AROUND SITE TO DIFFERENT ROOMS  
USE OF TWITTER/FACEBOOK GREAT

ORGANISATION OF LUNCH NOT GREAT.

OVERALL SATISFIED. INFL VERY IMPRESSIVE

- The ideas of interdisciplinary themes was very interesting, but I haven't found a lot of crossing-boundaries talks or discussion.
- It would be nice to have the opportunity to have a question round after the plenary talks or Keynotes, I hope that the opportunity created on LinkedIn to discuss with the speakers online will be used by participants!
- Very good organisation, thank you!

It's too bad the way the poster selection took form. I don't understand how someone can have 1000 votes, even though there were only 650 participants! Apparently the 2.0 stage cannot be implemented without the fair participation of people!  
were

Also too bad the workshops<sup>were</sup> during the conferences, they should have been given on Monday and Wednesday afternoon.

This was my first EAFS conference but certainly not my last! It kind of feels like 'home' here.

- poor ~~organization~~ catering
- badly organized. Separate and insufficient catering for Exhibitors.
- few posters many missing

LOVELY FOOD,  
LONG REGISTRATION QUEUE  
MORE TRIPS TO ICE WOULD BE GOOD  
EXCELLENT SOCIAL PROGRAM

workshops parallel to lectures are not very helpfull;  
because you miss interesting lectures or interesting  
workshops

I greatly appreciated the variety of workshops, so there  
were lots of interesting themes.

Workshops unfortunately were too short; you have to  
have more time when you are doing hands-on workshops

I'd appreciate workshops before or after the conference.  
There were lots of interesting talks parallel, so even if I  
wanted, I was just able to hear the ones in my own  
working field. Perhaps more detailed abstracts would

The last plenary lecture was my favorite.

Too many seminars at the same time

The food was very good!

Perhaps in a future conference, a platform could be  
made where job opportunities, traineeships, exchange  
positions etc. could be advertised.

Far too long time to wait for food.

I've never been so hungry at a conference

No fruit on coffee break!

Difficult to find lunch - no information.

~~Wanted to be informed about the food~~

Organization was extremely well done. Workshops really shouldn't be interspersed with the overall program, my opinion. Choices are appreciated but some workshops effectively took up whole 2 days while eliminated every other possibility. Some of the 1 hour workshops were fine but the extended ones should be put on separate days.

The EAFS conference was very well organized and the service was excellent!!

There was a problem with my payment and the communication via email was poor. Due to this issue I did not get to go on any visits organized by the EAFS.

Too many parallel sessions, several times I missed lectures due to timetable clashes.  
8:30 very early to commence plenary lectures.

Really not the quality of biology/molecular genetics presenters, posters & research names that I would have expected for such a big conference the research quality was lacking for me in this particular area.

Shouldn't be organising field visits when there are less than 10% of EAPS participants can actually attend due to restrictions in numbers.

---

my favourite was from Dr Dtar . The amount of sessions could be reduced, sometimes it was overwhelming !

---
